

# FIT FOR RENTAL

| Product Guide

**HEIGHT SAFETY.  
SIMPLIFIED.**

[guardianfall.com](http://guardianfall.com)

## WE BLEND SCALE WITH AGILITY.

As the world's largest independent height safety brand we have the scale to make things happen. But we think size is nothing without agility. Our structure enables us to adapt to changing demands and move fast when speed is needed.

## WE'RE WITH YOU EVERY STEP OF THE WAY.

We think expertly designed products are just the beginning. We support our partners with end-to-end tools, services and training – all designed to make it easier to choose, use and maintain their height safety system.

## WE BELIEVE ONE SIZE DOESN'T FIT ALL.

Our height safety range is unrivaled in its blend of breadth and depth. Backed up by complete training and custom engineered systems designed around users' needs.

## WE THINK 360.

Designed to seamlessly combine and connect. Bringing together fall protection, dropped object prevention and foreign material exclusion. Supported by our expert customer service team.

## WE FOCUS.

Height safety is what we do. Height safety is all we do. We're expert. We're undistracted. And we constantly go further to ensure our wearers return home safely at the end of the day.

### Declaration of conformity

The products shown in this guide have all been tested in our ISO 17025 accredited in-house laboratory in accordance with all requirements specified by the applicable standards and regulations.

# WHY CHOOSE GUARDIAN FOR YOUR RENTAL FLEET?

## COMPREHENSIVE FALL PREVENTION OFFERING

The Guardian *Fit for Rental* guide provides a wide selection of products that are ideal for expanding your rental fleet. These products are chosen specifically for their durability, versatility, and market demand, ensuring they will be reliable assets in your inventory.

## DURABLE & EASY TO MAINTAIN SOLUTIONS

Guardian *Fit for Rental* equipment is designed to withstand repeated rental cycles without requiring maintenance, reducing downtime and repair costs. This ensures that your equipment stays in the field longer, providing consistent revenue generation with minimal interruptions.

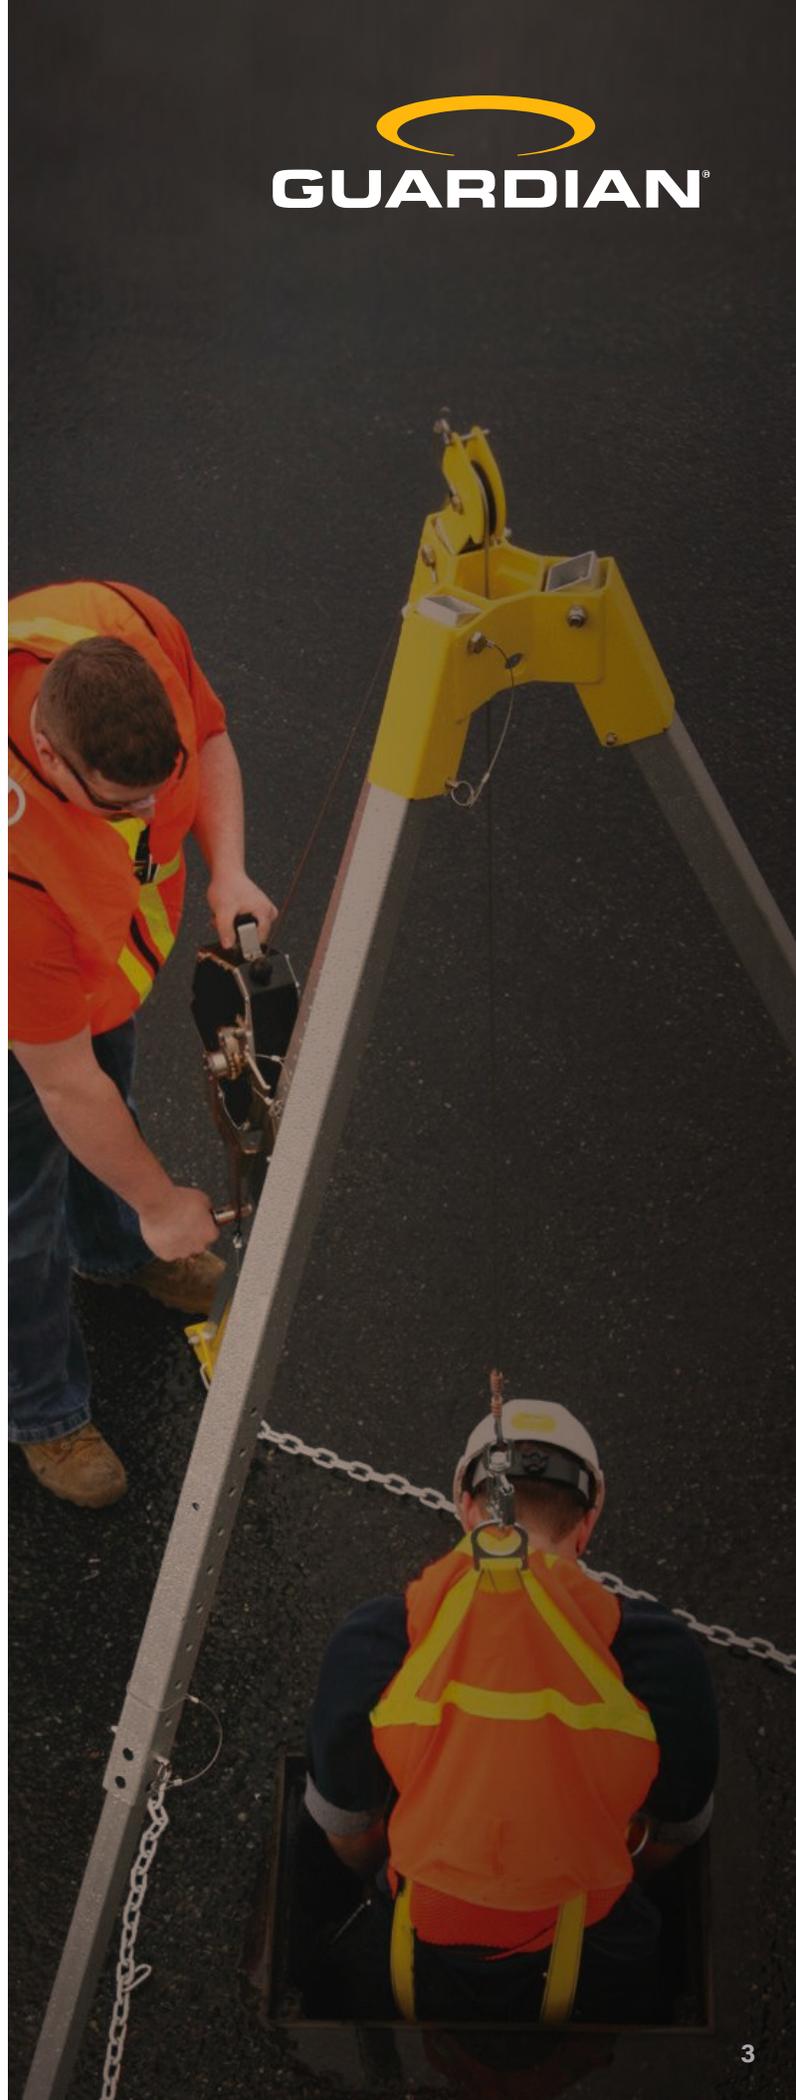

## EXCEEDS ALL APPLICABLE OSHA SAFETY STANDARDS

All Guardian *Fit for Rental* products have been rigorously tested in our ISO 17025 accredited in-house laboratory in accordance with all applicable national OSHA safety standards and regulations\* ensuring maximum compliance across job sites.

## MAXIMIZE ROI

Guardian *Fit for Rental* products are selected for their high demand and reliability, leading to fast rental turnovers, allowing you to recover your initial investment quickly, boosting revenues and providing ongoing profit potential.

\*Always check local regulations for complete compliance requirements.

# GUARDRAILS

Part shown #15183

15183	6 ft guardrail, powder-coated steel
15183-GALV	6 ft guardrail, galvanized steel
15189	6 ft guardrail, powder-coated steel with collapsible adapter
15182	8 ft guardrail, powder-coated steel
15182-GALV	8 ft guardrail, galvanized steel
15190	8 ft guardrail, powder-coated steel with collapsible adapter
15181	10 ft guardrail, powder-coated steel
15181-GALV	10 ft guardrail, galvanized steel
15191	10 ft guardrail, powder-coated steel with collapsible adapter
15202	12 ft guardrail, powder-coated steel
15202-C	12 ft guardrail, powder-coated steel with collapsible adapter

## G-Rail

The Guardian G-Rail functions as a complete passive fall prevention solution when used in combination with G-Rail baseplates and accessories. Guardrail systems are preferred over Fall Arrest systems because they form a barrier between the user and the fall hazard. G-rails can be left installed permanently but are also simple to disassemble and transport to a different location.

## Collapsible G-Rail Adaptor

Designed to offer easier access to areas outside the guardrail system.

15184	10" Toe-Board Attachment
15185	21 1/4" Toe-Board Attachment

## Toe-Board Attachments

The Guardian Toe-Board Attachment is composed of hot dipped galvanized steel for increased durability and weather resistance. Toe-Boards are required if any risk exists for tools equipment or materials to fall down from the working surface and on all roofs with slopes greater than 4/12 (vertical/horizontal).

# GUARDRAILS

## G-Rack Guardrail Storage System

The G-Rack Guardrail Storage System takes the hassle out of guardrail inventory and logistics. This stackable, durable and adaptable storage solution allows the guardrails to be moved and stored in a safer and more organized way both on the job site and in the warehouse. G-Racks come fully assembled and ready to use.

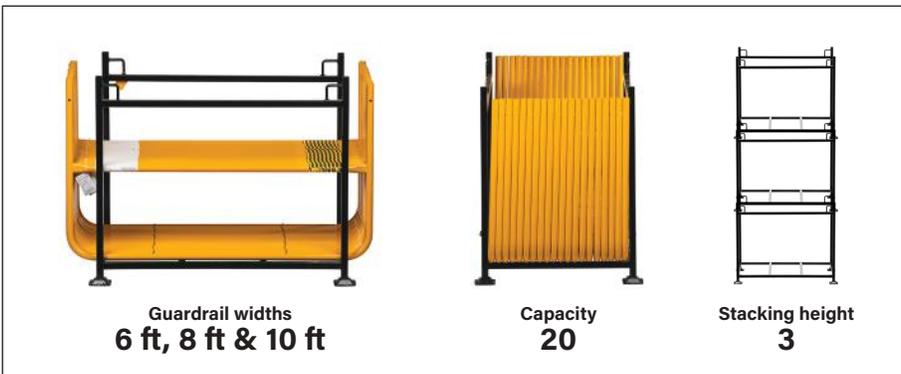

## G-Rail Baseplate

There are two baseplate options, the G-Rail Baseplate and the Quick Set Multi-Directional G-Rail Baseplate.

# GUARDRAILS

## Trench Box G-Rail Receiver

The Trench Box G-Rail Receiver is a great solution for keeping workers safe while working near exposed or deep trenches. Its unique design offers easy installation onto a variety of trench box walls and configurations across the job site. With a simple to use and precise adjustment wheel, guardrails can be attached quickly and easily to trench boxes for added safety.

# WARNING LINES

## Stanchion

The Guardian Warning Line Stanchion is specially designed for use with a reusable warning line. This lightweight stanchion, is 39" tall, is made from powder-coated steel for superior durability and weather resistance. It is easy to install, and its convenient handle facilitates simple transportation.

## Goose Stanchion

The Guardian Goose Warning Line Stanchion is a post component of a warning line system. It is used in combination with a cable line and high visibility flags. Warning line systems are the primary mechanism for identifying controlled access areas.

## Warning Line Post

A standalone post for warning lines intended for use with Guardian guardrail baseplate options. The Warning Line Post is a post component of a warning line system. It is used in combination with a baseplate, cable line, and high visibility flags.

## Steel Warning Flags

Guardian's Stamped Steel Warning Flag is cut-to-order for any size warning line system. These flags are powder-coated for superior durability and weather resistance and are stamped with "DANGER" for increased visibility.

## Replacement Warning Flag Line

The Guardian Replacement Flag Line is compatible with the Guardian Goose and Single Stanchions, as well as the Warning Line Post. Warning line systems are the primary mechanism for identifying controlled access areas.

# TIMBER GUARDRAILS

## Parapet Clamp

The Parapet Clamp Guardrail System is used in combination base and post for attachment onto structural parapets. It is used in combination with 2x4 timber rails to provide a complete Fall Prevention system.

## Parapet Anchor

The Parapet Anchor primarily functions as an anchor, uniquely designed to fit over a structural parapet. It additionally includes a guardrail post insert location to allow for a guardrail system to be set up along the parapet.

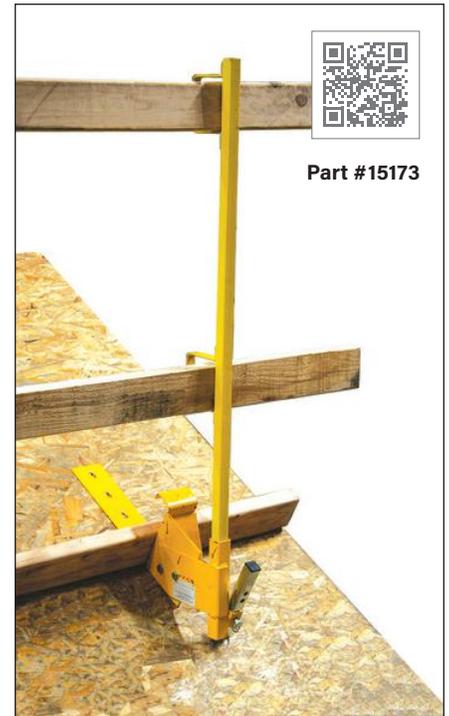

## C-Slab Grabber

The C-Slab Grabber utilizes a specialized clamping installation method specifically with concrete decks in mind. This non-penetrating post component of a modular guardrail system is intended for use with 2x4 timber rails.

## Residential Guardrail

The Residential Guardrail System is specifically designed to accommodate use on sloped roofs, making it ideal for contractors. The complete system includes a bracket and post, and should be used together with 2x4 timber rails. While steep roofs will still require a supplemental form of fall protection directly connected to the user, a guardrail system can provide an extra layer of protection.

# CONFINED SPACE, RESCUE & RETRIEVAL KITS

## Arc-O-Pod

Guardian's Arc-O-Pod is a high-quality Rescue and Retrieval system. The lightweight 7 ft 6" aluminum tripod is simple to set up and includes a storage bag for easy transportation. The legs can be adjusted to fit a maximum 5 ft 6" diameter hole. Its high-strength pulley system facilitates the proper use of mechanical lifeline equipment, and its drop-forged eye bolts can be used as an anchorage point for a secondary or back-up system. The Arc-O-Pod comes with a quick-mount bracket compatible with the Guardian 3-Way SRL.

20001	Kit: #15030 Arc-O-Pod tripod, #10974 Halo 3-Way SRL-R 50 ft, #00768 Ultra Sack Bag
20004	Kit: #15030 Arc-O-Pod tripod, #10981 Halo 3-Way SRL-R 65 ft, #00768 Ultra Sack Bag
15030	Arc-O-Pod tripod, #00768 Ultra Sack Bag

## Halo 3-Way SRL-R

Designed for both standard use and post-fall recovery, the Guardian Halo 3-Way Rescue and Retrieval SRL can be used to raise or lower workers onto work platforms, in confined space, and as an integral part of job site rescue planning.

# CONFINED SPACE, RESCUE & RETRIEVAL KITS

## TR3

The Guardian TR3 Tripod has a host of features and benefits for the user. At less than 33 lb (15 kg) its lightweight makes it easily transported, yet it is even stronger and more durable due to the new crown and feet design. The TR3 can be used with an array of other Guardian equipment allowing for safe anchorage while carrying out work tasks and rescue in confined spaces. It offers either an anchorage for suspended work or a secure Fall Arrest point if accessing via alternate means, for example a ladder.

4400001	Kit: #32200 TR3 tripod, #10974 Halo 3-Way SRL-R 50 ft, #10983 SRL Bracket, #32208 Bag
4400002	Kit: #32200 TR3 tripod, #10981 Halo 3-Way SRL-R 65 ft, #10983 SRL Bracket, #32208 Bag
32200	TR3 tripod, #32208 Bag

## Halo 3-Way SRL-R

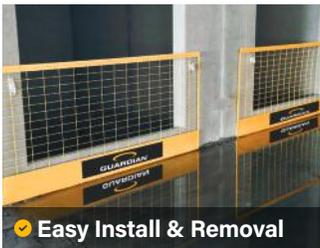

Designed for both standard use and post-fall recovery, the Guardian Halo 3-Way Rescue and Retrieval SRL can be used to raise or lower workers onto work platforms, in confined space, and as an integral part of job site rescue planning.

# EDGE PROTECTION BARRIER SYSTEM

Guardian's new Edge Protection Barrier System for perimeters and interior voids offers premium safety solutions, comprehensive ease of use, and unprecedented re-usability. Supported by industry-leading end-to-end project management from Guardian's expert Engineered Systems team, we streamline the process from design and quotation to product delivery and installation to ensure a seamless workflow. From conception to completion, Guardian is dedicated to ensuring that clients' edge protection needs are not only fully met but far exceeded.

**Easy Install & Removal**

Engineered with ease of use in mind. One person installation and removal using minimal, or no tools saves valuable time and resources.

**Versatile & Reusable**

Lightweight yet durable all-metal construction allows for years of easy transport, storage and re-usability within and across project sites.

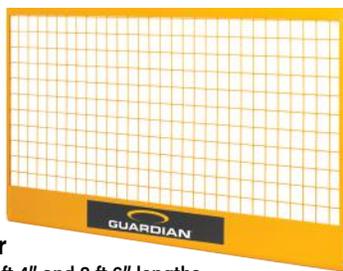

**Custom Color & Logo**

Select your company's color and add your logo to turn a safety solution into a branding opportunity on all your construction projects.

**Planning & Logistics**

Comprehensive support, including project planning and logistics assistance. We aim to simplify your process and ensure a smoother workflow.

**Barrier**  
4 ft 3", 6 ft 4" and 8 ft 6" lengths.

**Clamp 550**  
Non-penetrating clamp for connecting to slabs, stairs, parapets and other structural elements.

**Standard Post**  
Used in conjunction with sockets and brackets (not required with compression post).

**Ground Support Plate**  
Can be used as part of a warning line or guardrail system.

**Pre-cast Concrete Socket**

**Compression Post**  
Non-penetrating post used between floors.

**Sheet Pile Bracket**  
Attaches to steel sheet pile using a single screw clamp and no additional tools.

**Post Foot**  
Single bolt connection to concrete, steel, or wood substrates.

**Balcony Bracket**  
Clamp-on connection designed specifically for balcony edge protection.
