

## CALIFORNIA (CAL-OSHA) SPECIFIC PRODUCTS

Our façade maintenance anchors comply with Cal/OSHA standards, using drop forge eyes versus the standard U-bars which provide the required 2" eye opening. Davit and outrigger systems are designed around California-specific weight and design principles.

## CUSTOM NETTING SOLUTIONS

Guardian Engineered Systems provide custom netting according to the needs of specific buildings, to catch debris during all phases of construction. Most components are easily re-used in future projects.

## ENGINEERED SYSTEMS

## CUSTOM GUARDRAILS

Guardian's design and layout services work in tandem with our standard guardrail products. Ask us about customized, permanently attached rail systems, custom colors, and custom materials.

## DESIGN. SUPPLY. MAINTAIN.

## HEIGHT SAFETY. SIMPLIFIED.

## INTRO

In fall hazard protection, sometimes one size doesn't fit all. Whatever your specific needs or deadline, our in-house Engineered Systems team can help. We design, engineer, and fabricate custom solutions, and we've been doing it for over 30 years - on more than 3,000 projects. Whatever the brief, your workers' convenience and safety is our top priority.

## FAÇADE MAINTENANCE SYSTEMS

If your project needs a specific façade maintenance system, our team is ready - from initial design, and specification to fabrication, supply, and on-site testing. We specialize in customizing to unique buildings and sites with fast turnaround.

## ENGINEERING & SITE SERVICES

Modern construction is a new frontier. Guardian's engineers and project managers focus on adapting your fall arrest components quickly and efficiently, according to your written specifications. Then we follow up with on-site assistance and certification.

## CUSTOM FALL ARREST ANCHORS

Depending on your particular structure, buildings or project, your fall protection solution may require custom fall arrest anchors. Consult with our expert team of engineers and project managers to find out how flexible these products can be. All designs are reviewed by a third-party professional engineer (PE) licensed in the state of the project.

## PERMANENT HORIZONTAL LIFELINES

Choose from three horizontal lifeline systems: the Metal Energy Absorber, for easy installation without specialty tools or supervision; the Checkline Top Fix with pass-through, suited to retrofit installations; and the CB-Hybrid, combining pass-through and simple installation.
