

INSTALLATION INSPECTION & MAINTENANCE

Guardian offers regulatory required inspections of fall protection systems and PPE. We cover fall protection systems, abseil points window cleaning eyebolts, onsite fall arrest block inspections. On request, we can also do gutter and solar panel cleaning while onsite. With Motion Kentic our clients can log into the system to download or view their certificates.

CUSTOM GUARDRAILS

Guardian's design and layout services work in tandem with our standard guardrail products. Ask us about customised, permanently attached rail systems, custom colours, and custom materials.

DESIGN SERVICE

We offer design support to our certified installers. This means companies whose main business does not fall under protection installations can still provide professional and safe solutions. Guardian will provide the training and support throughout the process.

DESIGN. SUPPLY. MAINTAIN.

ENGINEERED SYSTEMS

2022

HEIGHT SAFETY.
SIMPLIFIED.

INTRO

In fall hazard protection, sometimes one size doesn't fit all. Whatever your specific needs or deadline, our in-house Engineered Systems team can help. We design, engineer, and fabricate custom solutions, and we've been doing it for over 30 years - on more than 3,000 projects. Whatever the brief, your workers' convenience and safety is our top priority.

ENGINEERING & SITE SERVICES

Modern construction is a new frontier. At Guardian, we focus on adapting your fall arrest components quickly and efficiently, according to your written specifications. We install, test, and certify our system to the latest standards.

**HEIGHT SAFETY.
SIMPLIFIED.**

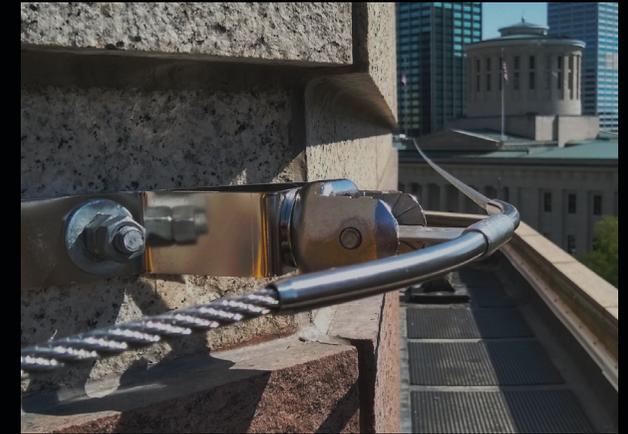

CUSTOM FALL ARREST ANCHORS

Depending on your particular structure, buildings or project, your fall protection solution may require custom fall arrest anchors. Consult with our expert team of engineers and project managers to find out how flexible these products can be. All designs and systems are installed to the latest version of BS7883.

FAÇADE MAINTENANCE SYSTEMS

If your project needs a specific façade maintenance system, our team is ready - from initial design, and specification to fabrication, supply, and on-site testing. We specialise in customising to unique buildings and sites with fast turnaround.

PERMANENT HORIZONTAL LIFELINES

Guardian offers a total 360-degree protection on all main roof types. Where the need requires we can offer solutions to fixing back to timber structures and deep insulated concrete decks using traditional posts. Load bearing solid masonry walls allows us to provide our clients with a wall fixed solution. A modern green roof is also not an issue with various solutions available.
